# **AEROFOAM NBR GLUE – TECHNICAL DATA SHEET**

**Type** Polychloroprene based contact adhesive for flexible elastomeric foams.

**Description** 

**Aerofoam NBR Glue** is a Polychloroprene based adhesive developed specially for flexible elastomeric insulation foams and closed cell foam insulation. It is one component solvent based inflammable adhesive with special tackyfier and additives. It is specially developed for being compatible with most of the substrates. It is very good in film forming nature which gives uniform bonding to many surfaces. **It** is an ideal product for Insulation for Elastomeric foam, Polyolefin Foam Insulation, Nitrile Sheet to Metal, Air Ducts, Slabs and Pipe Section.

**Intended Use** 

**Aerofoam NBR Glue** is an ideal product for Insulation for Flexible elstomeric foam, Polyolefin Foam Insulation, Nitrile Sheet to Metal, Air Ducts, Slabs and Pipe Section.

**Features** 

Excellent Adhesion and High Strength various substrate

Fire Resistant

High compatible with nitrile rubber

Excellent Boding to Porous and Non Porous Surface

Chemical Resistant Excellent drying

**Excellent Heat Resistant** 

**UV** Resistant

## **Specification**

Property	Value	Unit of Measurement	Method
. ,			
Specific Gravity	0.84 ±.10	g/cc	ASTM D 1475-98
Solid Content	24±2	%	ASTM D 1644-01
Viscosity(SP6,RPM20)	1200-2000	cPs	ASTM D 2196
Flash Point (Wet)	>100	°C	ASTM D 92

#### **Other Data**

Form supplied Liquid Color Yellow color Service Temperature -25° C to 120°C Chemical Resistance Excellent Drying time 5 - 20 minutes **Properties Excellent Coverage Surface Preparation** The surface should be structurally sound, clean, dry, leveled and free from dust curing compounds grease and other loose debris according to BS 8203 **Application Procedure** Apply Aerofoam NBR Glue evenly with brush, roller, spray gun or pressure feeding equipment evenly on both surfaces, wait until solvent is fully evaporated. After the evaporation of solvent in adhesive, assemble the surface by applying normal hand pressure. Special care must be taken on the edges and adhesive must be evenly applied. **Packaging** Metal Can Storage SHELF LIFE up to 18 month from manufacturing date, if stored below 25 °C Store under cover, protect from direct sunlight and high temperature Failure to comply with the recommended storage conditioning may result in premature deterioration of the product or packaging.

### **Health & Safety**

As with all chemicals, caution should always be exercise
